PROFESSIONAL SUMMARY

ICT officer at the State Department of ICT and Digital Economy, Software Division with a strong foundation in backend development and full-stack system design. Skilled in Python (Django), PHP (Laravel, CodeIgniter), HTML, CSS, JavaScript, and Bootstrap.

Passionate about designing secure, scalable digital systems that improve public service delivery and promote digital innovation. Experienced in developing software for inter-ministerial use, drafting concept notes, Terms of Reference (TORs), and ICT policy documents.

Currently deepening expertise in cloud infrastructure, API-driven systems, and secure architecture for public sector digital transformation.

CORE SKILLS

• Programming Languages: Python, PHP, JavaScript, Go
• Frameworks & Libraries: Django, Laravel, CodeIgniter, Bootstrap
• Databases: MySQL, PostgreSql
• Tools & Technologies: Git, Jupyter, Power BI, Google Data Studio, Excel
• Concepts: API Design, Secure System Development, Data-Driven Systems, Cloud Integration
• Soft Skills: Technical Documentation, Cross-Team Collaboration, Agile Development, Problem Solving

PROFESSIONAL EXPERIENCE

State Department of ICT and Digital Economy — ICT Officer
Nairobi, Kenya | February 2025 – Present

- Develop and maintain internal software systems for various ministries and government agencies.
- Design and implement secure backend systems and APIs supporting national digital services.
- Draft concept notes, TORs, and ICT policies aligned with national digital transformation goals.
- Collaborate with multi-disciplinary teams to analyze user requirements and deliver scalable solutions.
- Support startup ecosystem initiatives through tech innovation and mentorship platforms.

Futuristic Ltd — Software Developer
Nairobi, Kenya | June 2022 – January 2025

- Designed and developed responsive web applications (e.g., KAA IDMS, EFNS).
- Led system analysis, user requirement gathering, and project documentation.
- Deployed, tested, and optimized web solutions with ongoing performance monitoring.
- Provided user training and created user manuals and support documentation.

Better SMS — Database Attaché
Nairobi, Kenya | February 2021 – May 2021

- Developed stored procedures and optimized SQL queries for data retrieval and reporting.
- Ensured database performance, integrity, and availability through continuous monitoring.

Kenya Broadcasting Corporation — ICT Support Attaché
Nairobi, Kenya | May 2019 – July 2019

- Provided end-user and network support, troubleshooting, and documentation for ICT systems.

Kenya Bureau of National Statistics — Enumerator
Nairobi, Kenya | July 2019 – August 2019

- Collected and verified national census data through household enumeration.

Independent Electoral and Boundaries Commission — Clerk
Nairobi, Kenya | August 2017 – August 2017

- Verified biometrics and managed voter records during national elections.

EDUCATION

Bachelor of Science in Computer Technology
Multimedia University of Kenya | September 2017 – November 2021

ADDITIONAL INFORMATION

• Interests: Digital government, startup ecosystems, emerging technologies
• Professional Goals: Full-stack engineering, cloud computing, and cybersecurity in public sector innovation
